Endpoints

1. Login

Digunakan untuk mendapatkan jwt token Authorization

Request

Type = POST

URL = `https://api-pipe.bumilindo.co.id/v1/login-ecommerce`

Content-Type = `application/json`

Body

```
{
  "Username" : "coba@Bumilindo.com",
  "Password" : "12345"
}
```

Response Success(200)

```
{
  "data": {
    "access_token": "15146546",
    "expired_at": "2025-06-10 13:47:57.175",
    "username": "coba@Bumilindo.com"
  },
}
```

```
"message": "Success",  
"success": true  
}
```

Response Error (400):

```
{  
  "error": "User not found"  
}
```

Response Error (401):

```
{  
  "error": "Invalid password"  
}
```

Field Descriptions:

Field	Type	Required	Description
Username	String	Yes	Email digunakan untuk login
Password	String	Yes	Password dari username

2. GetProduct

Untuk mendapatkan data product

Request

Type = GET
URL = https://api-pipe.bumilindo.co.id/v1/getproduct-ecommerce
Content-Type = application/json
Authorization = Bearer {token}

Response Success(200)

```
{  
  "success": true,  
  "error": null,  
  "message": "",  
  "process_time": 0.2159985,  
  "records": 1,
```

```
